

D0 learning curves and source-selected epochs

A. Source development

B. T3 source-only selection

(S) RQ-P01; PP-U-MIN; source-only validation; 598 spectra / 69 physical masters; $400\text{--}1,800\text{ cm}^{-1}$.

Vertical line: median selected checkpoint epoch. Later epochs include only still-running fits.

Quartiles describe fit variation, not confidence intervals. Horizontal dotted line: three-class chance.
