Foundation — no model outcome access
P00
Governance and artifact contract
P01
Data and representation freeze
P02
Split and information-regime freeze
Model development — source-only selection
P03
Definitive classical benchmark
P04
Compact deep ERM baseline
P05
Acquisition-aware development
Evaluation — primary first; secondary regimes kept separate
P06
Definitive T1 / T2 / T3-ZS paired evaluation
P07
Adaptation and target calibration
P08
Robustness and preprocessing
P09
Narrow open-set evaluation
P10
Representation and failure analysis
P11
Statistical inference and Route A / B / C decision
P12
Paired TikZ / HTML figures manuscript and validation
Synthesis and publication freeze
Solid arrows: required primary dependency.
Dashed arrows: secondary analysis after primary freeze.
